Scholarly primitives

ABSTRACT

In this article we bring together the results of a number of humanities e-research projects at King's College London. This programme of work was not carried out in an *ad hoc* manner, but was built on a rigorous methodological foundation, firstly by ensuring that the work was thoroughly grounded in the practice of humanities researchers (including 'digitally-aware' humanists), and secondly by analysing these practices in terms of 'scholarly primitives', basic activities common to research across humanities disciplines. The projects were then undertaken to provide systems and services that support various of these primitives, with a view to developing a research infrastructure constructed from these components, which may be regarded as a 'production line' for humanities research, supporting research activities from the creation of primary sources in digital form through to the publication of research outputs for discussion and re-use.

Expanding Public Access to the Results of Federally Funded Research

Subscribe

Posted by Michael Stebbins on February 22, 2013 at 12:04 PM EDT

E-Mail Tweet Share +

The Obama Administration is committed to the proposition that citizens deserve easy access to the results of scientific research their tax dollars have paid for. That's why, in a policy memorandum released today, OSTP Director John Holdren has directed Federal agencies with more than \$100M in R&D expenditures to develop plans to make the published results of federally funded research freely available to the public within one year of publication and requiring researchers to better account for and manage the digital data resulting from federally funded scientific research. OSTP has been looking into this issue for some time, soliciting broad public input on multiple occasions and convening an interagency working group to develop a policy. The final policy reflects substantial inputs from scientists and scientific organizations, publishers, members of Congress, and other members of the public—over 65 thousand of whom recently signed a *We the People* petition asking for expanded public access to the results of taxpayer-funded research.

UK House of Lords enquiry on Open Access

Posted by Janna Wellander on November 13, 2012

11/01/2013

The UK's House of Lords (upper chamber of Parliament) Science & Technology Committee is conducting an enquiry into Open Access. Written submissions are welcome. Individuals and organisations are invited to give their views on the actions taken by Government and RCUK following publication of the Finch report. The HoL has issued guidance on how to make written submissions. In particular, there are four issues highlighted by the committee:

- support for universities in the form of funds to cover article processing charges, and the response of universities and HEIs to these efforts
- embargo periods for articles published under the Green model
- engagement with publishers, universities, learned societies and other stakeholders in the development of research council Open Access policies and guidance
- challenges and concerns raised by the scientific and publishing communities, and how these have been addressed.

Library Still Pays

- **Pay once for perpetual access**
- **Pay for global access rather than local access**

Terms: Green vs. Gold

OA Journals

- Immediate global access to content
- May have APCs

OA Repositories

- Subscription journals
- Author self-archiving
- May have embargo

Open Access Journals

What are Gold OA Journals?

- **The “Gold Standard”**
 - ❖ Free of charge for readers
 - ❖ Materials openly accessible across the internet
 - ❖ Financed by payments for article publication, not subscription

- **Gold Standard, Not “Author Pays”**
 - ❖ Payment can come from grants, funds and is often included in the cost of research

- **With better Google results,
higher impact of work**
 - ❖ Increased citation impact
 - ❖ Private sector access

Scholars retain the copyright on their work

- ❖ Can submit it to an institutional repository
- ❖ Scholars don't give copyright to publisher

Library Involvement

- **Author Funds**
 - ❖ Not passing fees on to authors instead of a subscription model
 - ❖ Toronto, Ottawa, Manitoba, SFU, MUN, Concordia, Calgary, Ryerson
- **Journal Hosting**
 - ❖ Open Journal Systems

Memorial OA Funding Criteria

- **Available to:**
 - ❖ All faculty, graduate students, staff, post-docs, emeriti, and honorary research profs who have an peer-reviewed article accepted to an OA journal
 - ❖ Up to \$3000 a year for each researcher, and a maximum of \$3000 per article

What does it cover?

- **Only fund those articles accepted to the Gold Standard**
 - ❖ Journal is peer reviewed
 - ❖ No subscription fees for any content
 - ❖ Available online immediately, no cost to the reader
 - ❖ Author maintains copyright, using Creative Commons licensing or similar
 - ❖ A copy of the funded paper made available though the Memorial University Research repository

Open Journal System (OJS)

- **Create and host online-journals**
 - ❖ Article submission
 - ❖ Peer review workflow
 - ❖ Journal layout
 - ❖ Reader access
 - ❖ Archiving
 - ❖ Creative Commons licensing

Faculty Journal

- **Analecta Hermeneutica**

- ❖ Annual refereed journal of the [International Institute for Hermeneutics](#) (IIH). It provides an intellectual forum for interdisciplinary, inter-religious, and international hermeneutic research. The journal publishes research in the form of articles, reviews, and other scholarly contributions in all hermeneutically related fields, with a particular focus on philosophy, theology, and comparative literature.

Analecta Hermeneutica is the annual refereed journal of the [International Institute for Hermeneutics](#) (IIH). It provides an intellectual forum for interdisciplinary, inter-religious, and international hermeneutic research. The journal publishes research in the form of articles, reviews, and other scholarly contributions in all hermeneutically related fields, with a particular focus on philosophy, theology, and comparative literature. We invite scholars from various linguistic communities to contribute innovative and critical articles to the hermeneutic conversation. Although the primary language of *Analecta Hermeneutica* is English, articles in German, French, Italian, and Spanish are welcome. They will be published accompanied by an English abstract. All submissions are subject to peer review.

Abstract

Health care has arguably been the most important issue in Canadian politics in the past decade. This paper focuses on the extent to which the media affect public perceptions of "the way things are" in the Canadian health care system. Individual perceptions of the state of health care are analyzed as being a function of personal experience with the system, loyalty or pre-formed opinions and the information that the individual receives through the media. Results indicate that media use has a significant effect on the likelihood of negative perceptions regarding the state of health care.
