Catelynne Sahadath, University of Calgary
@metacatiele

September 26, 2013
What is a Catalogue?

"a complete list of items, typically one in alphabetical or other systematic order, in particular: a list of all the books or resources in a library . . ."

3 parts:

Data (AACR2/RDA)

Record (entry, card, MARC)

Search interface (list, card catalog, OPAC)
# History of Data and the Record

<table>
<thead>

Linked Data

Four Rules:
1. Use URIs as names for things.
2. Use HTTP URIs so that people can look up those names.
3. When someone looks up a URI, provide useful information.
4. Include links to other URIs, so that they can discover more things.

The MISSING LINK into bibliographic records...

LC Linked Data Services

VIAF
Welcome to The Registry!
This is the home page for the Open Metadata Registry (formerly the NSDL Registry).
The Metadata Registry provides services to developers and consumers of controlled vocabularies and is one of the first production deployments of the RDF-based Semantic Web Community's Simple Knowledge Organization System (SKOS).

How to begin
Step-by-step illustrated instructions...

Play in the Metadata Registry Sandbox
If you just want to experiment and play around a bit, go on over to the Metadata Registry Sandbox. The code is exactly the same, but it's using a non-production database. (Please be careful not to kick any sand out of the box) NOTE: The sandbox has its own domain now. If you had bookmarked the beta site thinking that it was the sandbox (and we did say that), it will shortly be a real beta site again complete with broken code, wacky ideas, and disappearing data. Please change your sandbox bookmarks to point to the Metadata Registry Sandbox. Any of the sandcastles that you had built in the beta, back when you thought it was the sandbox, are still there.

Anne of the Island
Anne of Avonlea
Anne’s House of Dreams
Anne of Windy Poplars
The Da Vinci Code

This book describes the attempts of Robert Langdon, Professor of Religious Symbology at Harvard University, to solve the murder of renowned curator Jacques Saunière of the Louvre Museum in Paris. A baffling cipher is found near his body. Saunière’s granddaughter, Sophie Neveu and Langdon attempt to sort out the bizarre riddles and are stunned to discover a trail of clues hidden in the works of Leonardo Da Vinci.

The unraveling of the mystery requires solutions to a series of brain-teasers, including anagrams and number puzzles.

Mentioned In 81 Books

The conclusion of The Da Vinci Code shocked people with its interpretations about one of our deeply held cultural beliefs. What about The Lost Symbol? Do you think the ideas expressed—such as noetics and other New Age concepts—which look ahead instead of backward, will have a similar impact?

— Arne De Keijzer and Daniel Burstein, Secrets of The Lost Symbol
The conclusion of *The Da Vinci Code* shocked people with its interpretations about one of our deeply held cultural beliefs. What about *The Lost Symbol*? Do you think the ideas expressed—such as noetics and other New Age concepts—which look ahead instead of backward, will have a similar impact?

— Arne De Keijzer and Daniel Burstein, *Secrets of The Lost Symbol*
What can we do now?

Talk. With colleagues. With administrators. With vendors.

Play. eXtensible Catalog. Local Linked Data projects. RIMMF.

Share what you know. Find out what others know.

Be a rebel. Add URIs to MARC $0

Find ways to convert MARC records to Linked Open Data.
"Although a daunting challenge, this conversion of our bibliographic records from MARC to Linked Open Data will become one of the most powerful drivers in the transformation to the Semantic Web. Placing our data and resources where people are actually looking for it, and tying them intelligently to the wealth of the Web."

Philip E. Schreur, Program for Cooperative Cataloging "Linked Data for Libraries: Why should we care? Where should we start?" April 2012 (youtube)

To the Ground

Communicating RDA changes for non-Metadata staff

- Developing a training strategy
- Common changes
- Examples

What is "To the Ground?"

Bringing metadata changes to a level that is
Common Changes

- Examples

What is "To the Ground?"

- Bringing metadata changes to a level that is useful to the end-user
- Preventing RDA information overload
  "Information overload is not simply the problem of too much information. It is the problem of too much irrelevant information" (1)

Is that really necessary?
• Preventing RDA information overload
"Information overload is not simply the problem of too much information. It is the problem of too much irrelevant information" (1)

**Is that really necessary?**

• Important changes for cataloguers may not be relevant to reference staff
• If the information in the record is changing, it becomes important
To the Ground

Explaining RDA

- Gone is the fear of the unknown
- Importance of developing context
- Context example:

Why are we implementing RDA?

Impact on Record Interpretation

- Emphasis on transcription
  Information recorded as it appears in the item
  Including articles, order, capitalization, language, errors, punctuation
- Inaccuracies transcribed as they occur; notes added to indicate the corrections
  *Vale, Latin!*
• Emphasis on transcription
  Information recorded as it appears in the item
  Including articles, order, capitalization, language, errors, punctuation
• Inaccuracies transcribed as they occur; notes added to indicate the corrections
• Vale, Latin!
  Et. al; sic.; S.l.; S.d.; I.e.; Fl.
• Abbreviations, be gone!
  Mostly in carrier description (physical description):
    p.     pages
    ill.   illustrations
    + p.   incomplete
  No more abbreviations for numbering
• 260 replaced by 264.
  When a 264 is used, can distinguish between functions
  (publication, distribution, publication, manufacture)
• First place of publication, order it appears on the resource
• Dates in roman numerals no longer converted to Arabic numerals
In-record Terminology Changes

RDA Canada Knowledge Exchange
rdacake.wikispaces.com
Welcome to the RDA CANadian Knowledge Exchange

This wiki is a place for Canadians to collaborate on RDA projects, share ideas and plans for implementation, and to temporarily store and share training materials and workflow documentation. After implementation the materials will be moved to a permanent location, most likely on the CLA website. Regardless of the final address, the materials will be accessible to all.

Given the geography and population distribution in Canada, making training materials available on the web is an important part of Canada's implementation of RDA.

You are welcome to use the information and documents for non-commercial purposes, as per the Creative Commons license parameters.

The sections within this site are listed on the right navigation pane.
